

Installation & Owners Manual

EZ Board by Lectrotab makes getting in and out of your boat easier and safer. It's a compact, heavy-duty boarding assist handle designed to give boaters a solid handhold exactly where they need it. Built with marine-grade materials and engineered for durability in harsh saltwater environments, EZ Board installs easily on most transoms and swim platforms. It's a simple upgrade that dramatically improves safety and convenience for swimmers, divers, and anyone climbing back aboard

Assembly and Installation Instructions

Lay handle on a flat surface

Insert the inner piece into the handle until it stops in the bend. Drill a pilot hole through both sections using a 1/8" drill bit and secure with the #10 supplied screw

Insert the inner piece into the bottom extension poll. Drill a pilot hole through both sections using a 1/8" drill bit

Align the bottom extension pole in the rod holder how you would like the orientation of the handle.

Secure with the #10 supplied screw

Install and to make sure of fitment. Adjust if necessary

Installation

1. Slide the **EZBOARD** handle into the rod holder until the locating pin engages the **EZBOARD** slots.
2. Rotate the handle to the right or left to lock in place. Both ends of the **EZBOARD** handle are slotted for ease and convenience.
3. Simply adjust the orientation of the handle to achieve the optimal position for boarding and balance.

Removal

1. Rotate the handle to the right or left to lock in place. Both ends of the EZ BOARD handle are slotted for ease and convenience.
2. Slide the EZ BOARD handle out of the rod holder until the locating pin disengages the EZ BOARD slots.
3. Store away in a secure place

DOMESTIC LIMITED WARRANTY
